

QUALITY POLICY

The purpose of MAHER II S.L. is to manufacture thermoplastic products by injection that meet the expectations and needs of our customers.

The quality system implemented follows the compliance of the UNE-EN-ISO 9001:2015, considering Maher II S.L., that this is the only way that enables us to achieve excellence under the Total Quality environment, continuous improvement and efficiency of processes, customer satisfaction and continuity of the company in the future.

The Quality Policy of Maher II S.L., is based on the following principles:

- Commitment to meet the requirements and needs of all stakeholders of the organization, especially those of our customers and legal requirements. This compliance is a fundamental element to obtain the loyalty and trust of our customers.
- Continuous improvement in all areas is the only guarantee of survival. Our goal is efficiency in the correct performance of our processes.
- Orientation towards achievement of objectives, for which the necessary actions will be taken and the necessary human and technological resources will be assigned, as well as for the revision of these and of the policy itself, in order to maintain its effectiveness and adapt to changes in the environment.
- The most valuable asset of the company is its employees and their experience, therefore it is the mission of this Management to provide each and every one of the members of our company with the education, motivation, training and resources for the development of the tasks entrusted to them.
- To improve the work processes by means of a constant technological improvement adapted to the new market requirements.

Management is committed to reviewing the Management System to ensure its effectiveness and that it is appropriate to the context of the organization, supporting its strategic direction; and is responsible for ensuring that its Policy is publicly and available and is known, understood and applied by all employees and people who collaborate with our organization.

Signed: Laura Maestre
